Modular S 36 Sideboards

All Modular sideboards come equipped with prefabricated cable outlets. The metal is perforated at these positions and can be pressed out if required. Each storage compartment made of metal is equipped with this feature in the floor panel.

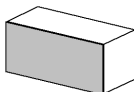

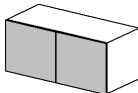

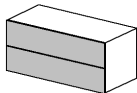

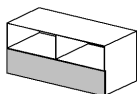

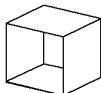

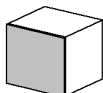

New: all modules can be freely constructed with "40" and "80" units.

STACK Sideboard & shelving system

Stack is a modular sideboard & shelving system. First, determine the width of the sideboard/shelf (ST-B).

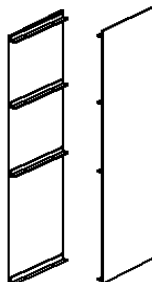

Then decide on the number of the intermediate shelves (ST-M) and the distance between the shelves (26 cm or 39 cm).

The total height results from the above decisions (ST-S). Finally you choose between various storage compartments (ST-Z).

Note: From a height of 120 cm, we recommend attaching the shelving system to the wall with the angle brackets provided.

Important: Please always provide a drawing when ordering a sideboard / shelf. Please refer to page 15 for a grid template.

STACK grid template

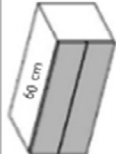

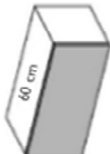

Planning STACK

- STACK is based on a connector system with a 15 cm wide raster.
- Please create a sketch of the favored model by drawing the level heights of 26 cm (double spaced) or 39 cm (triple spaced) into the 15 cm wide raster.
- One compartment per each level and each meter is required.
- Please make sure to leave a gap of at least 15 cm between the compartments as well as to the side panel.
- In order to place the writing flap element at seat / working height (72 cm) please combine underneath a level of 26 cm and 39 cm, respectively.

Planning

SCALA Shelving system

SCALA is a modular shelving system and can be planned as a free standing shelf or wall mounted. Free standing SCALA is only available in the depth of 32 cm. The wall mounted SCALA can be planned in 32 and 42 cm depth, also in combination. The total width results from the selection and combination of the different shelves or boxes, which can be placed in a 14 or 24 cm hole spacing grid.

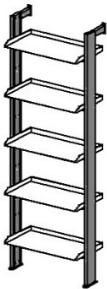

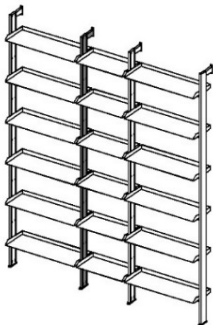

All illustrations are examples. Numerous variations are possible.

Example template: SCALA shelving H 213 x W 247,5 x D 32 cm

Paint finish in standard colour, semi-matt

SCALA Shelving system

Paint finish in standard colour (semi-matt)

SCALA free standing shelf D 32 cm

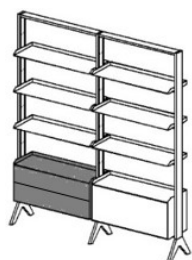

Please note: In order to achieve more stability, we recommend including at least one box for a free standing version of SCALA with one or more columns. Otherwise a reinforcement underneath the complete first level (s. page 20) is required. 2 boxes cannot be planned directly on top of each other.
